DATABASE EMPTY STATE GUIDE

Copy all

If there are no robot models or source signals populated, initialize the active Next.js database with the project setup commands:

1. **Initialize DB tables**
```
python -m humanoid_atlas db init
```

2. **Seed robot models**
```
python -m humanoid_atlas ingest seeds --file data/seeds/robot_models.seed.yml
```

3. **Seed inventory and relations**
```
python -m humanoid_atlas ingest seeds --file data/seeds/inventory.seed.yml
```

Analytics & Stance Insights

Aggregate counts for perspective themes and source relevance status.

This workspace uses live database rows only. No sample data is injected here.

Internet Sources	Robot Models	Contributions	Scored Records
5000	17	4	5000

Scope: Internet Sources | Time bucket: Month | Trend factor: Relevance Status | Matrix row: Source Type | Matrix column: Relevance Status

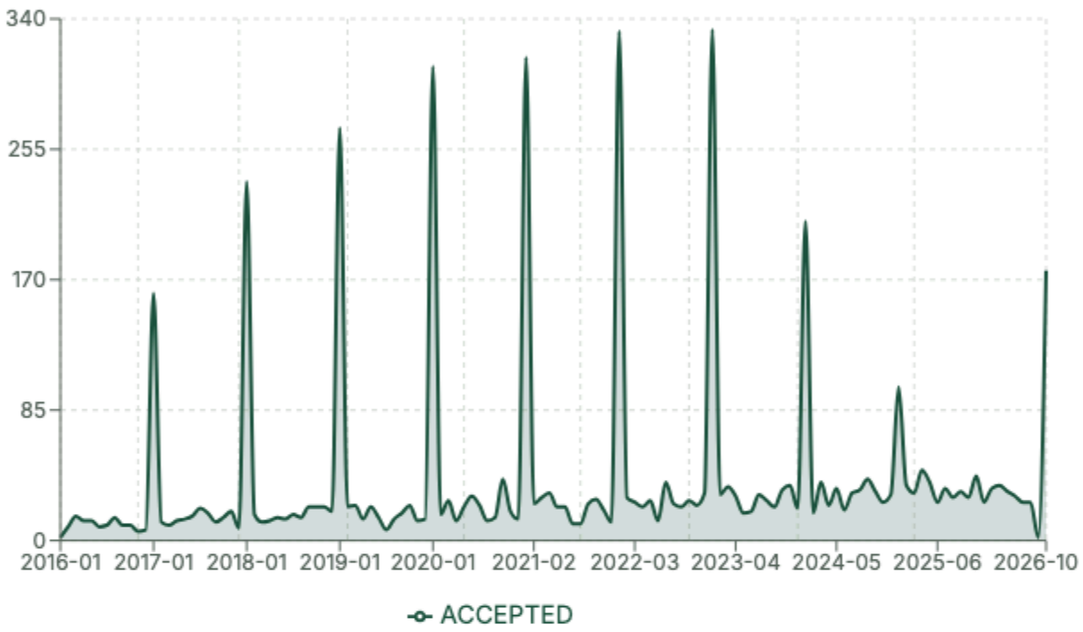

Confidence lens

Records in scope	With usable dates	Average confidence	Top trend factor
5000	5000	0.83	ACCEPTED

Appearance Trend

Internet Sources

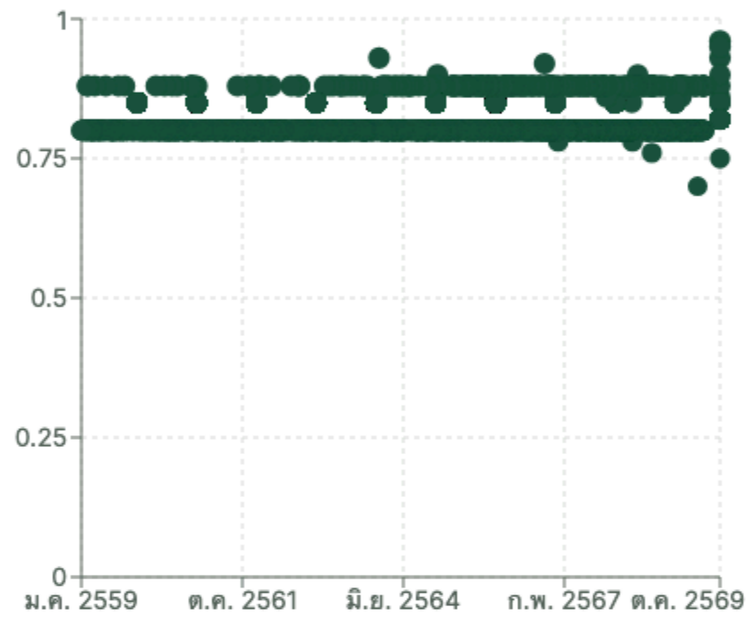

Monthly or yearly record appearance across the selected scope.

Confidence Lens

On

Confidence versus time for records with scoring signals.

Factor Matrix

sourceType × relevanceStatus

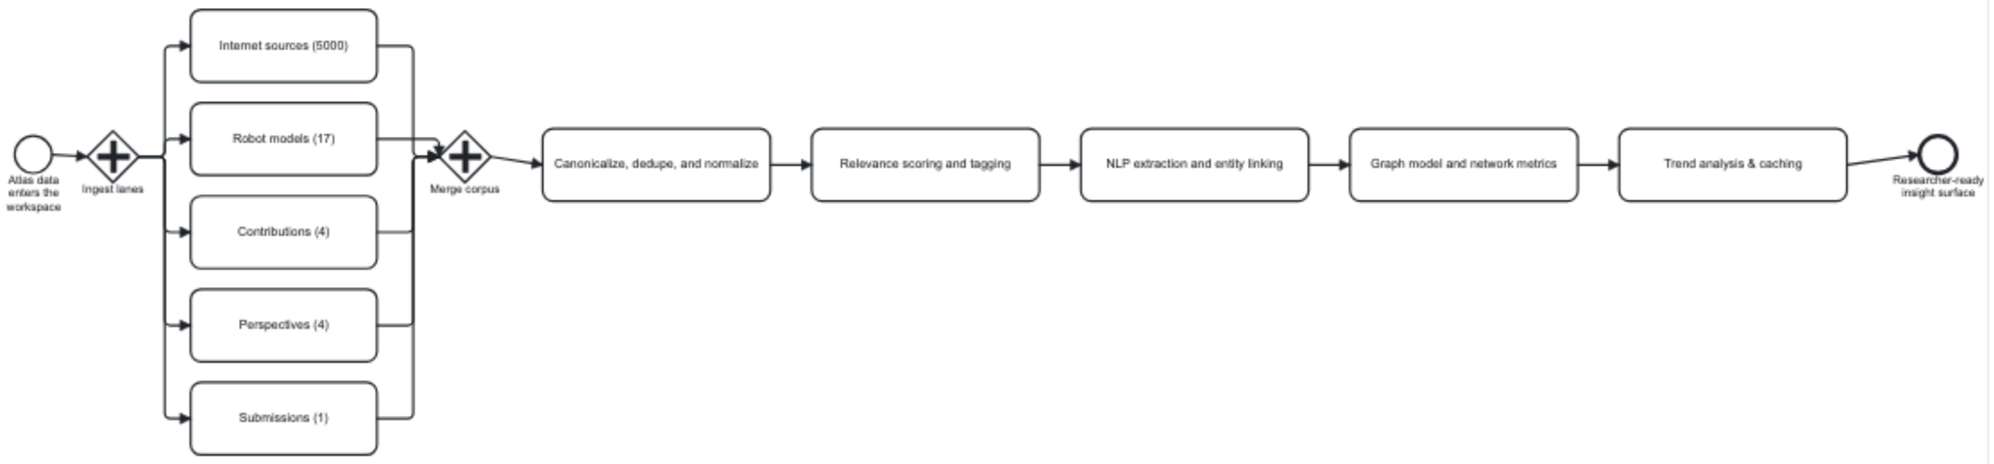

Pair any two factors to surface combinations across the selected corpus slice.

ROW / COLUMN	ACCEPTED	REMAINING LIVE CATEGORIES

Owned Robot Inventory

Public-Safe Mode

Physical robot units managed, operated, or tested by the project team.

Public-Safe Mode Active: Serial numbers, exact locations, and private logs are masked or hidden.

ROBOT MODEL	DISPLAY NAME	STATUS / OWNERSHIP	CUSTODIAN	CONDITION	LOCATION	SERIAL NUMBER	ACCESSORIES & DOCS	NOTES / REPAIR LOG	UPDATED
No inventory records found. Run database seed or submit an inventory update.									

Ecosystem Contribution Map

AI-powered cluster analysis of humanoid robotics research, development, and inventory across Thailand.

Ecosystem Clusters	Database Items Analyzed	Geolocated Entities	Analysis Engine
0	21	0	Gemini 1.5 Flash

This page uses Gemini AI to analyze all humanoid robotics development, contributions, and inventories in the database to cluster them by organization and geolocate them within Thailand.

The AI analysis has not run or could not finish, so no clusters are shown. Nothing is made up in their place.

Google Maps API key required

Add NEXT_PUBLIC_GOOGLE_MAPS_API_KEY to the environment to render the live Google Map. AI-mapped contribution clusters are still listed below.

CLUSTER / INSTITUTION	LOCATION	TYPE	RECORDS	ECOSYSTEM SUMMARY
No ecosystem clusters analyzed yet. An admin can run the AI analysis.				

Atlas Relationship Network

Interactive graph of robots, inventory, organizations, papers, sources, perspectives, and contributions.

This interactive network graph maps relations between humanoid robotics research labs (e.g., KMUTT FIBO, Chulalongkorn LIRA, VISTEC), commercial enterprises, robot models (e.g., NAO, Pepper, Dinsaw), and academic publications. Nodes represent developer entities, institutions, and robot specifications, while edges visualize contributions, ownership, and media discussion links.

HRI WELLNESS LIVING LAB

One profile. Every robot understands you.

Every human has different needs. Every robot should know how to respect them. Teach one care robot your comfortable distance, pace, eye contact and care needs once. Your Care Passport carries them to every robot you meet, and each robot applies them within its own hardware.

Create my Care Passport → | I already have a passport | Open the robot console

≈ 1 min	4	0
guided calibration	ways to answer: buttons, voice, camera, auto	video frames stored or sent

OBJ·THz·····-·-·-·v01
Care Passport
Human preferences · schema v1

READS THE SAME PASSPORT

- SIMULATION — **Robot A · full humanoid** — Moves, waits, looks at you, hands items over
- SIMULATION — **Robot B · screen-only** — Fixed base, no arms: adapts on screen
- API — **Your system** — GET /api/hri/passport/{token}
- FUTURE — **Physical care robots** — Not connected. No hardware is controlled.

Simulation: three.js robots running in this browser. API: a live HTTP contract any system can call today. Future: physical robot integration, not built.

01 Create a passport · 02 Robots · 03 Hospital journey · 04 Research

01 · CARE PASSPORT

Teach the robot once

Verify your email if you want to keep the passport, give consent, then greet the robot. Every answer changes its behaviour right away, so you can feel the difference before you save.

Hello. When you are ready, press Start. I will follow your lead.

Ready

How it works (about 1 minute)

1. Greet the robot with a wai. It waits for you first.
2. It steps closer one step at a time. Tell it when it is too close, too fast, or just right.
3. Choose how it looks at you and whether it speaks.
4. Tell it about your care needs: how anxious robots make you, how it should talk, whether it may hand you things.
5. Get your Care Passport (code + QR) and walk the hospital journey: reception, medicine delivery, doctor call.

Camera is optional and runs on this device only. No video is stored or sent. Only your preferences and the interaction log are saved.

☐ I agree to save my preferences as a Care Passport. If I turn on the camera, the video is processed on this device only and is never stored or sent. If I answer by voice, my browser's speech service may process the audio; this site does not save it.

Required before the robot starts.

Talk or type your answers

Press the microphone and speak, or type if you prefer. Every step also has buttons.

Start | Use camera (optional)

Auto: just stand in front of the camera

One tap and you're done. The robot watches for your wai, how you react as it comes closer, and where you look. The camera runs on this device only. Feelings are never guessed from your face.

▸ Interaction log (5)

Who is this passport for?

Optional: you can start without it. Verify your email if you want this passport recorded as yours.

Tick the consent box first. No email is stored until you agree.

Email

you@example.com | Send code

Your email only identifies who owns this data. Robots never see it, we never send marketing, and you can delete it at any time.

02 · ROBOT ECOSYSTEM

Different hardware, same respect

A Care Passport describes the person. A capability profile describes the robot. The adapter translates one into the other, and safety rules always come first.

Robot A · Full humanoid care robot — SIMULATION

Mobile · head and arms · speaker and screen

Moves	✓ yes	Head & gaze	✓ yes
Arms	✓ yes	Speaker	✓ yes
Screen	✓ yes	Max speed	×2

Robot B · Screen-only telepresence — SIMULATION

Fixed base · no head or arms · speaker and screen

Moves	— no	Head & gaze	— no
Arms	— no	Speaker	✓ yes
Screen	✓ yes	Max speed	–

Adaptation priority

1. Hardware safety
2. Clinical protocol
3. Your Care Passport
4. Robot default

A passport can make a robot slower or keep it farther away. It never overrides a safety rule.

See it adapt in the robot console →

Care robots in the Atlas registry

Real robot models from the HumanoidTH registry. In the hospital journey their behaviour is simulated in the browser; none of them is connected.

03 · HOSPITAL JOURNEY

Three stations, two robots each

At every station you meet the same robot twice: once as a default robot that has not read your passport, once after it has. You rate each from 1 to 5. The order alternates between stations, so the comparison is fair.

S1
Reception & check-in
A reception robot greets you and points you to the clinic.

S2
Medicine delivery
A delivery robot brings your medicine, handing it over or placing it nearby.

S3
Doctor call
A telepresence robot connects you to your doctor.

1 Introduction · 2 Robot without passport · 3 Robot with passport · 4 Rate your comfort

Steps 2 and 3 swap order from one station to the next.

Start the journey → | You need a Care Passport first, or enter an existing code.

04 · RESEARCH OBSERVATORY

What the Living Lab is learning

SIMULATION Simulation data. Visitors rated three.js robots in a web browser, not physical robots, under uncontrolled conditions. This is not a clinical study and should not be cited as one.

PERIOD: **All time** | Last 30 days | Last 7 days

Download aggregates (CSV)

Human comfort

Mean rating, 1 (very uncomfortable) to 5 (very comfortable)

■ With passport ■ Default robot

With passport	5.0	n = 9
Default robot	–	n = 0

– **Within-person difference**
No paired ratings yet. Pairs come from the counterbalanced journey.

BY STATION

Medicine delivery		Reception		Doctor call	
With passport	5.0 n = 3	With passport	5.0 n = 3	With passport	5.0 n = 3
Default robot	– n = 0	Default robot	– n = 0	Default robot	– n = 0

BY ROBOT

Mirror Telepresence System		Mr SAM outpatient service robot		Pinto Robot	
With passport	5.0 n = 3	With passport	5.0 n = 3	With passport	5.0 n = 3
Default robot	– n = 0	Default robot	– n = 0	Default robot	– n = 0

Condition order: Passport first: 0 · Default first: 0 · Before counterbalancing: 9

Behaviour preferences

Share of 12 passports

Soft eye contact	42%
Slower movement	8%
Spoken voice	50%
No reaching	0%
Large captions	0%
Typical comfort distance	far
Greeting	Wai 12 · Wave 0 · No gesture 0

Calibration

21 saved calibrations by input mode

Buttons (19)	90%
Voice (0)	0%
Camera (2)	10%
Auto (camera) (0)	0%

"Too close" signals during calibration: 4

Data quality

Verified participants	0
Passports without a verified email	12
Station sessions	9
Sessions without a valid rating	0

Limitations

- Simulated robots on a screen do not create the physical presence of a real robot. Comfort may differ in person.
- Visitors self-select. The sample is not representative of patients.
- Camera-based measurements have not been validated against real people; they are estimates.
- Not tracked, by design: calibration abandonment, recalibration and consent withdrawal. Deleting a passport is a hard delete and leaves no record to count.
- Without a verified email, one person can create several passports, which can count them more than once.

Meet a robot with your HRI Passport

Enter the 6-character code from your passport, or scan the QR code you got in the Living Lab.

Passport code

E.G. 7KQ4MZ

Meet the robot

No passport yet? Create one in the Living Lab →

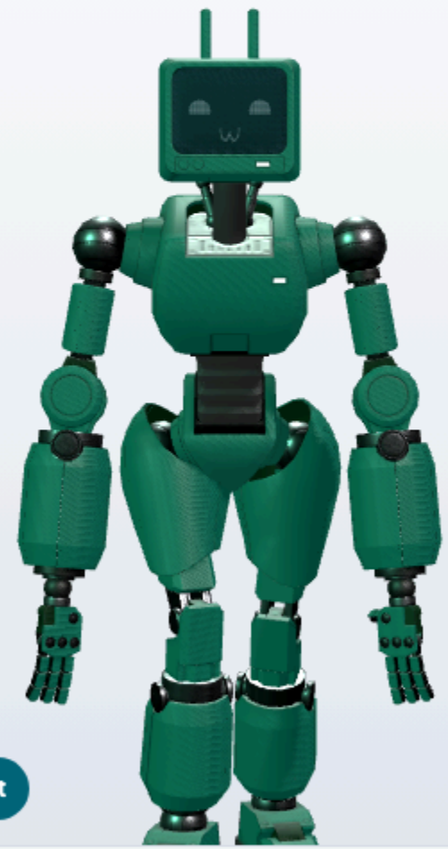

Your hospital journey

Press start. The robot will read your Care Passport first.

Robot with your passport

Reception & check-in

The robot confirms your appointment and points you to the right clinic.

Mr SAM outpatient service robot · hospital administrative service robot · King Chulalongkorn Memorial Hospital / Thai Red Cross Society

CONDITION 1 OF 2
Robot with your passport

CONDITION 2 OF 2
Robot without your passport

You meet this robot twice: once without your passport, once with it. The order alternates between stations so the comparison is fair.

Start condition 1 of 2

What this robot read from your passport

Greeting	wai + bow
Stops at	medium
Movement	normal
Eye contact	soft
Voice	spoken
Communication	normal
Handing items	may reach to hand items

Too close | Too far

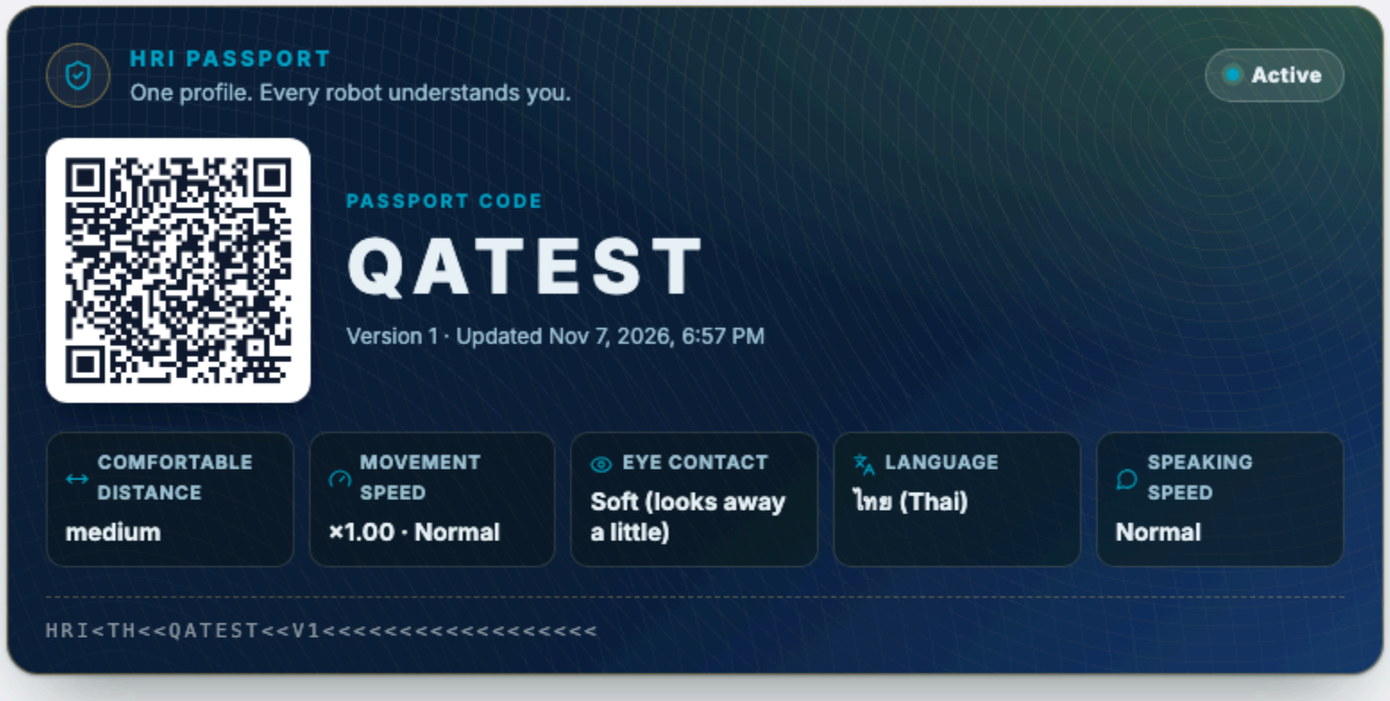

Back to the Living Lab

HRI PASSPORT

My HRI Passport

Active

One profile every robot understands. A robot reads this card's link through its API and adapts how it approaches, moves, makes eye contact, speaks and hands things to you.

Scan to open this card

Copy link | Share

Status

Status	Active

Last updated	Nov 7, 2026, 6:57 PM
Expires	No expiry

This QR is a key

Anyone who scans the QR or opens this link can read the preferences robots use. They cannot see your nickname, email or how robots make you feel, and they cannot edit or delete without your edit key. Share it only with robots and people you trust.

What every robot reads

INTERACTION PREFERENCES

COMFORTABLE DISTANCE	MOVEMENT SPEED
medium	×1.00 · Normal

EYE CONTACT	LANGUAGE
Soft (looks away a little)	ไทย (Thai)

SPEAKING SPEED
Normal

CARE AND COMMUNICATION

VOICE	CAPTIONS
Spoken	Normal

HANDING ITEMS	GREETING
Hands items to you	Wai

Owner settings

Read-only card

This browser does not hold the edit key. You can still use the card; editing and deleting need owner access.

Edit key

Paste your 43-character edit key

Unlock

ONE PROFILE, EVERY ROBOT

Robot console

This console reads a real HRI Passport through the same public API a robot uses, then shows how two different robots apply the same preferences. Everything here is a browser simulation.

Browser simulation. No real robot is connected or controlled.

Back to the Living Lab

Read a passport

Passport access token

Paste the 43-character token, or the passport card link

The token is the secret in the passport QR. It stays in this tab and is never stored.

Read passport

Clinical protocol. Apply a ward protocol: movement at most ×0.8, never closer than medium distance

Priority, highest first: hardware safety → clinical protocol → your Care Passport → robot default. A passport never overrides a safety rule.

Voice commands (Thai)

Talk to the simulated robots in Thai, or type a command. Both robots obey within their own hardware: the screen-only robot cannot wai or walk, and says so.

SOUND CHECK

Test microphone | Test robot voice

Press Test microphone, then say something in Thai. The bar should jump when you speak.

Start listening | Robot replies by voice | AI conversation: on

Or type a command

e.g. สวัสดี, ไหว้หน่อย, เข้ามาใกล้ ๆ

Send

TRY SAYING

สวัสดี | ไหว้หน่อย | โบกมือ | เข้ามาใกล้ๆ | ถอยหลัง | ยื่นของให้หน่อย | พยักหน้า | ส่ายหัว | มองซ้าย | มองขวา | ทำหน้าเศร้า | ใจเย็นๆ | ช้าลง | หยุด

WHAT THE ROBOTS HEARD

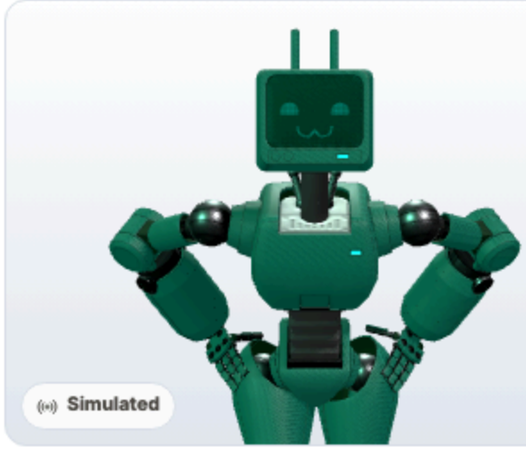

No commands yet.

AI conversation sends what you say, as text, to this site's server and then to Google Gemini to write the reply. Passport preferences are included when a passport is loaded, never anxiety, nickname or token. Nothing is stored by this app. No real robot is controlled.

Robot A · Full humanoid care robot

Mobile · head and arms · speaker and screen

Read a passport

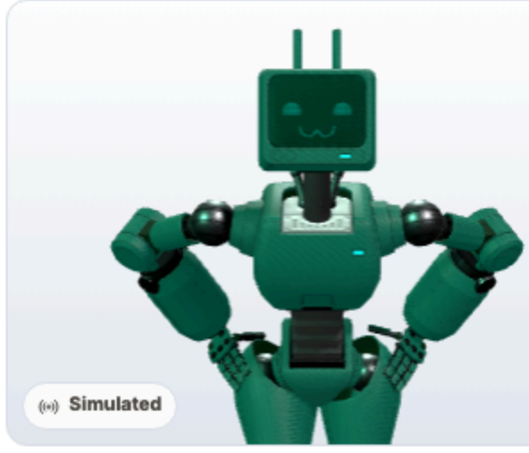

No passport loaded yet. The two robots are idle until you read one.

No passport loaded yet. The two robots are idle until you read one.

Robot B · Screen-only telepresence

Fixed base · no head or arms · speaker and screen

Read a passport

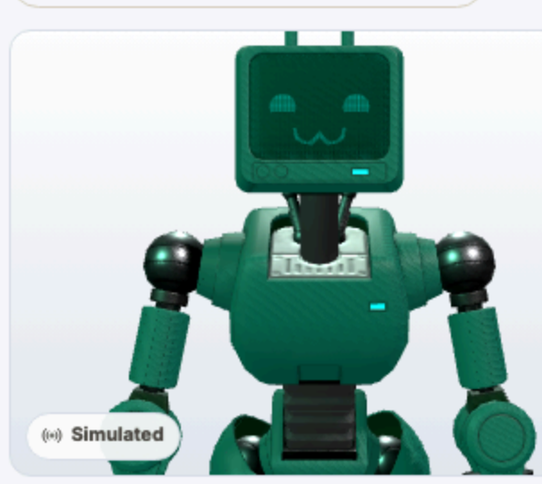

No passport loaded yet. The two robots are idle until you read one.

No passport loaded yet. The two robots are idle until you read one.

Default robot

What a robot does when it has no passport: waves, moves in close at full speed and stares.

Preview: default behaviour (no passport)

สวัสดีครับ!

STOPS AT close	MOVEMENT fast
EYE CONTACT direct	GREETING wave
VOICE spoken	HANDING ITEMS hands it to you
CAPTIONS normal	DEMEANOUR friendly
SPOKEN LANGUAGE Thai	

REQUESTED → APPLIED

No compromises needed.

Speak care summary

Replay behaviour
